Re: Expiration of Seachem Products

To Whom It May Concern,

Many Seachem products do not have an expiration date by virtue of the ingredients used to make the products. Many mineral and non-organic components are shelf-stable, and do not have a finite shelf-life, and may be used for years with continued efficacy. If a product does not have a printed date of expiration, it can safely be assumed that the product does not expire. If you have any questions about the date of expiration for any specific products, please reach out to Seachem's Technical Support team at: support@seachem.com

Regards,
Seachem Laboratories, Inc.
