Product Benefits 產品特長

- This product is a premium Goldfish food manufactured with rich nutrition of high protein high fat for Goldfish's high growth
- This product is formulated with Probiotics, which helps to maintain a clean water environment.
- Manufactured with top quality fish meal and krill meal, which Goldfish find very palatable.
- 本產品是高蛋白高脂肪高營養的增體用金魚飼料。● 配加有益生菌促進維護水環境潔淨。● 由優質魚粉和磷蝦粉科學精製而成，適口性超群。

Feeding Instruction 飼喂方法

Goldfish do not have stomachs and normally will over eat. To protect the health of your Goldfish, please only feed an amount that can be easily consumed within five minutes. Fluctuations in water temperature can affect a Goldfish's eating habits. Please use the following chart as a feeding guide.

與常用的金魚飼料一樣每天給飼量為5分鐘以內能吃完為宜。請注意不要讓其有吃剩物泡在水內。因金魚沒有胃，進入腸內的量即為被攝取，而過多攝食有可能引起消化不良，需特別加以注意。金魚消化能力依水溫而異，請參照下表。

Season 季节	Water Temperature 水溫	Digestion Ability 消化能力	Feeding Instructions 給飼方法
Spring & Autumn 春、秋	Low 低	Low 低	As the water is cool in morning and evening, feed Koi only during the daytime. 因早晚水溫低，請在水溫高的白天給飼。
Rainy Season 梅雨	Low-Mild (big changes in temperature) 低・溫和 (水溫差大)	Fickle 不穩定	As rain will cool the water rapidly, feed Koi moderately. 雨水會使水溫驟降，請勿過多給飼。
Summer 夏	High 高	High 高	As warm temperature will increase a Koi's appetite feed Koi for several times per day. 食欲旺盛需要量，請每天給飼數次。
